### **Springboard Insights**

Given the vast array of social and sporting events taking place across the country last week, it is perhaps not surprising that shopper numbers rose  $% \left( 1\right) =\left( 1\right) \left( 1\right)$ against the previous week by +0.3% but declined annually by -1.4%. This is in response to the annual rise of +0.5% and weekly uplift of +2.8% for the same week in 2017. What is most interesting is to view the performance by day, where it is easy to see the impact of the football and other events on footfall, with the drops coming clearly for every location type to bring an overall Springboard Index drop of on Sunday 1st July (-5.4%) and Saturday 7th (-7.9%) against last year.
