

# Regent Road

## Improvement works from 29 August

Starting on Wednesday 29 August, Manchester City Council and Salford City Council will begin major improvement work on six junctions on and around Regent Road.

Once complete, the £15million scheme will help to ease congestion on one of the busiest routes into and out of Manchester city centre.

The advice is to plan ahead, allow extra time for journeys, use public transport where possible, and use alternative routes during morning and evening peak times.
